No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1993 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

Contents of Volume 151

NUMBER 1, OCTOBER 1, 1993

SYLVIA B. POLLACK AND JOYCE TSUJI. Effects of rIL-7 on Murine Bone Marrow NK Precursor Cells 1

LAURA A. BRAY, HUI SHAO, AND SANDRA J. EWALD. Effect of Ethanol on Development of Fetal Mouse Thymocytes in Organ Culture ... 12

AJAY B. SINGH, KRIS HIEHLE, MANJEET SINGH, AMANDA E. JETZT, SEAN M. O'CONNELL, AND RICHARD A. MANN. The Host Response in Graft versus Host Disease. I. Radiosensitive T Cells of Host Origin Inhibit Parental Anti-F1 Cytotoxicity in Murine Chronic Graft versus Host Disease ... 24

RICHARD A. MANN, AJAY B. SINGH, MANJEET SINGH, AND AMANDA E. JETZT. The Host Response in Graft versus Host Disease. II. The Emergence of Host Protective Cells Is in Part Determined by Background Genomic Compatibility ... 39

KEN-ICHI HARUNA, MASAKI HIKIDA, YOSHIYUKI OHSUGI, AND HITOSHI OHMORI. The Secondary Antigen-Specific IgE Response in Murine Lymphocytes Is Resistant to Blockade by Anti-IL4 Antibody and an Antisense Oligodeoxynucleotide for IL4 mRNA ... 52

MICHAEL A. LYNES, DIANE J. TIBBETTS, LISA M. SWENSON, AND CHARLES L. SIDMAN. Dynamic Associations of CD45 and Thy-1 on Plasma Membranes of C3H-*gld*/*gld* and C3H-*lpr*/*lpr*. I. Potential Effects on Proliferation and Phosphatase Activity ... 65

MARTIN J. MACPHEE, JULIUS GORDON, NICOLAS V. CHRISTOU, LEOPOLDO SANCHEZ-CANTU, AND HAROLD H. RODE. Cells Recovered from Human DTH Reactions: Phenotypic and Functional Analysis ... 80

MAMI OGIMOTO, TATSUO KATAGIRI, KIMINORI HASEGAWA, KAZUYA MIZUNO, AND HIDETAKA YAKURA. Induction of CD45 Isoform Switch in Murine B Cells by Antigen Receptor Stimulation and by Phorbol Myristate Acetate and Ionomycin ... 97

G. M. PEPPER, K. AGGARWAL, J. TORRES, R. VELASCO, K. DADHANIA, D. DRAKE, AND J. FUTRAN. The Biologic Activity of ACTH and Related Peptides on Peripheral Blood Mononuclear Cells Is Altered by the Presence of Dexamethasone ... 110

MARI HIRANO, HISASHI ARASE, NORIKO ARASE-FUKUSHI, KAZUMASA OGASAWARA, KAZUYA IWABUCHI, TAMOTSU MIYAZAKI, ROBERT A. GOOD, AND KAZUNORI ONOÉ. Reconstitution of Lymphoid Tissues under the Influence of a Subclinical Level of Graft versus Host Reaction Induced by Bone Marrow T Cells or Splenic T Cell Subsets ... 118

NIKOLA L. VUJANOVIC, HANNAH RABINOWICH, YOUNG JO LEE, LORENZ JOST, RONALD B. HERBERMAN, AND THERESA L. WHITESIDE. Distinct Phenotypic and Functional Characteristics of Human Natural Killer Cells Obtained by Rapid Interleukin 2-Induced Adherence to Plastic 133

KARL DERES, WERNER BECK, STEFAN FAATH, GÜNTHER JUNG, AND HANS-GEORG RAMMENSEE. MHC/Peptide Binding Studies Indicate Hierarchy of Anchor Residues ... 158

BARBARA J. WHALEN AND IRVING GOLDSCHNEIDER. Identification and Characterization of B Cell Precursors in Rat Lymphoid Tissues. I. Adoptive Transfer Assays for Precursors of TI-1, TI-2, and TD Antigen-Reactive B Cells ... 168

SHAOKANG P. LI AND RICHARD A. MILLER. Age-Associated Decline in IL-4 Production by Murine T Lymphocytes in Extended Culture ... 187

S. KNAAN-SHANZER, W. J. C. ROMBOUTS, Y. WESTERMAN, G. WAGEMAKER, AND D. W. VAN BEKKUM. Occurrence of a Soluble Nonspecific Suppressor Factor in the Serum Early after Birth 196

SHORT COMMUNICATIONS

LYDIA VISSER, RAYMOND LAI, AND SIBRAND POPPEMA. Patterns of Leucocyte Common Antigen Expression in Peripheral Blood T Cell Populations ... 218

CONSTANTIN G. IOANNIDES, BRYAN FISK, DOMINIC FAN, WILLIAM E. BIDDISON, J. TAYLOR WHARTON, AND CATHERINE A. O'BRIAN. Cytotoxic T Cells Isolated from Ovarian Malignant Ascites Recognize a Peptide Derived from the HER-2/neu Proto-oncogene ... 225

PAPERS TO APPEAR IN FORTHCOMING ISSUES ... 235

NUMBER 2, OCTOBER 15, 1993

E. KILCHHERR, V. MANDAK, K. WAGNER, AND C. H. HEUSSER. Regulation of Human IgE Response in hu-PBL-SCID Mice ... 241

ANAHID JEWETT AND BENJAMIN BONAVIDA. Pivotal Role of Endogenous TNF-α in the IL-2-Driven Activation and Proliferation of the Functionally Immature NK Free Subset 257
SHUNSEI HIROHATA AND HIROSHI OKA. Modulation of T Cell Production of Interferon-γ by Human Monocytes: Effect of Engagement of CD14 on Monocytes 270
HILKE FRICCIUS, PETRA SIEGELS-HÜBENTHAL, ARNIKA REHBEIN, ELKE SCHLOTZ, AND GRAHAM PAWELEC. Induction of Hyporesponsiveness in Human Lymphocytes-T Despite Their Expression of both the Co-receptor CD28 and Its Ligand B7 283
GARY M. HALLIDAY, KATE A. ODLING, AND H. KONRAD MULLER. Carcinogen-Treated Skin Allografts Rejected by T Lymphocytes Specific for Class I but Not Class II MHC Antigens .. 291
MARK K. HAYNES, LAIRD G. JACKSON, ROCKY S. TUAN, KENNETH J. SHEPLEY, AND J. BRUCE SMITH. Cytokine Production in First Trimester Chorionic Villi: Detection of mRNAs and Protein Products *in Situ* 300
XIAOSUI JIANG, BRYAN LEONARD, RITA BENSON, AND CYNTHIA L. BALDWIN. Macrophage Control of *Brucella abortus:* Role of Reactive Oxygen Intermediates and Nitric Oxide 309
XIAODAN YE, INGO GEORGOFF, SETH FLEISHER, FREDERICK D. COFFMAN, STANLEY COHEN, AND KERIN L. FRESA. The Mechanism of Epipodophyllotoxin-Induced Thymocyte Apoptosis: Possible Role of a Novel Ca^{2+}-Independent Protein Kinase 320
JUDY W. ARNOLD, GARY R. KLIMPEL, AND DAVID W. NIESEL. Tumor Necrosis Factor (TNFα) Regulates Intestinal Mucus Production during Salmonellosis 336
WALTER H. GOTLIEB, LYNN A. BRISTOL, ALLAN M. WEISSMAN, SCOTT K. DURUM, AND LÁSZLÓ TAKÁCS. Upregulation of T Cell Receptor γ Chain Transcription by Interleukin-2 345
YOUSEF ABU-AMER AND ZVI BAR-SHAVIT. Impaired Bone Marrow-Derived Macrophage Differentiation in Vitamin D Deficiency 356
BARRY K. WERSHIL, CHRISTOPH W. TURCK, SUNIL P. SREEDHARAN, JINHONG YANG, SONGZU AN, STEPHEN J. GALLI, AND EDWARD J. GOETZL. Variants of Vasoactive Intestinal Peptide in Mouse Mast Cells and Rat Basophilic Leukemia Cells 369
DONG-WON KANG, SUSUMU OHKAWA, SIMONETTA DIFABIO, KATHERINE W. MERRILL, KOHTARO FUJIHASHI, MASAFUMI YAMAMOTO, CHRISTOPHER J. MILLER, MARTA MARTHAS, JERRY R. MCGHEE, JOHN H. ELDRIDGE, MICHAEL MURPHEY-CORB, AND HIROSHI KIYONO. Characterization of T and B Cells Isolated from Mucosa-Associated Tissues of the Rhesus Macaque ... 379
DONALD A. COHEN, ELIZABETH A. FITZPATRICK, SHIRISH S. BARVE, JOEL M. GUTHRIDGE, ROBERT J. JACOB, LINDA SIMMERMAN, AND ALAN M. KAPLAN. Activation-Dependent Apoptosis in $CD4^+$ T Cells during Murine AIDS 392
AMALA GUHA, NICHOLAS DAINIAK, MELVIN FREEDMAN, IRVING GOLDSCHNEIDER, AND ROBERT E. CONE. Regulatory Effect of Interferon-γ and Phorbol Esters on the Surface Expression and Biosynthesis of MHC Class I Antigens by Human Leukemia Cells 404
LOTHAR VOGEL AND BEVERLEY L. PIKE. Effects of Combinations of Cytokines on Murine Antigen-Specific B Lymphocytes 414
RYO ABE, CHRISTINE A. KOZAK, MICHELE FOO-PHILLIPS, JOSEPH ROBERTS, AND MARY ANN C. PRINCIPATO. Involvement of Multiple Factors in the Clonal Deletion of Self-Reactive T Cells 425
MONICA LAMAS, EVA SANZ, LUIS MARTIN-PARRAS, ENRIC ESPEL, PETER SPERISEN, MARY COLLINS, AND AUGUSTO G. SILVA. Glucocorticoid Hormones Upregulate Interleukin 2 Receptor α Gene Expression 437

SHORT COMMUNICATIONS

TAO DAO, VLADIMÍR HOLÁŇ, AND JUN MINOWADA. Interleukin-2 Production by T Cells: A Study of the Immunoregulatory Actions of Interferon-α, Interferon-γ, and Tumor Necrosis Factor-α in Phenotypically Different T Cell Clones 451

INFORMATION FOR AUTHORS

Cellular Immunology will provide an international medium devoted exclusively to publication of original investigations concerned with the immunological activities of cells in experimental or clinical situations. The scope of the journal will encompass the broad area of *in vitro* and *in vivo* studies of cellular immune responses. These include, for example, delayed type hypersensitivity or cellular immunity; immunologic surveillance and tumor immunity; transplantation immunology; autoimmunity, resistance to intracellular microbial and viral infection; immunologic deficiency states and their reconstitution; antigen receptor sites; thymus and lymphocyte immunobiology, etc. The chief criteria for acceptance of papers submitted for publication are the originality, clarity, and quality of the work reported. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Cellular Immunology* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

All manuscripts should be submitted to the Editor: Dr. H. Sherwood Lawrence, Infectious Disease and Immunology Division, Department of Medicine, New York University Medical Center, 550 First Avenue, New York, New York 10016.

Form. Manuscripts should be typewritten and double-spaced throughout (including tables, footnotes, references, and figure captions); the original typescript should be prepared on one side of a good grade of 8½ × 11-inch white paper, with 1-inch margins on all sides. Mimeographed or duplicated manuscripts will be accepted *if they are indistinguishable from good typed copies.* Submit three complete copies in order to expedite processing of the manuscript. Each copy *must* include all figures and tables.

Number the pages consecutively. *Page 1* should contain the article title, author(s), and affiliation(s); at the bottom of the page type a short running head title not exceeding 45 characters (including spaces), and the name and complete mailing address (including zip code) of the person to whom proofs should be sent. *Page 2* should contain a short abstract, approximately 100 to 150 words in length.

Headings. The organization of the paper must be clearly indicated by appropriate headings and subheadings.

Abbreviations. Do not use final periods after abbreviations of measure (cm, sec, kg, etc.) in text or in tables, except for "in." (inch). Use the American Chemical Society *Style Guide,* 1986, as a reference.

Symbols. Underline letters that represent mathematical symbols; these will be set in *italic* type.

Equations. Number equations consecutively, with the number placed in brackets to the extreme right of the equation. Refer to equations as Eq. [3] or simply [3], except at the beginning of a sentence, when the word Equation should be spelled out. Punctuate equations to conform to their place in the syntax of the sentence.

Footnotes. Use only when absolutely necessary, in which case type the footnotes consecutively, double-spaced, on a separate sheet of paper in the order of their appearance in the text. Use superscript Arabic numbers [1,2], etc. in the text citations and in the list.

Tables. Number tables consecutively with Arabic numerals in order of their appearance in the text. Type each table, double-spaced throughout on a separate sheet; avoid vertical rules. Supply a short descriptive title below the table number. Type table footnotes, lettered [a,b], etc. at the end of the table.

Figures. Number figures consecutively in the text with Arabic numerals. Type legends double-spaced together on a separate sheet. Original illustrations no larger than 8½ × 11 inches are preferred. All illustrations should be in finished form suitable for reproduction. They should be planned to fit the proportion of the printed page (5 × 8 in.). Lettering on drawings should be of professional quality or generated by *high-resolution* computer graphics and should be large enough (10–12 points) to take a reduction of 50–60%. Drawings should be made with black India ink on tracing linen, smooth surface white paper, or Bristol board. Alternatively, *high-quality* computer graphics may be acceptable. Graphs should be plotted with black India ink on light blue or white coordinate paper with coordinates properly labeled; grid lines that are to show should be inked in black. Photographs should be submitted as glossy prints (5 × 7 or 8 × 10 inches) and not marred by staples, paper clips, or pencil marks. Groupings of photographs should be indicated; if mounting is necessary, use 10- to 12-point *flexible* board.

Illustrations in color can be accepted only if the authors defray the cost.

References. These should be cited in the text by a number in parentheses and listed at the end of the paper in numerical order. Note the following style for book and journal citations:

1. Leopardi, E., and Rosenau, W., *Cell. Immunol.* **83,** 73, 1984.
2. Buckley, R. H., *In* "Monoclonal Antibodies: Probes for the Study of Autoimmunity and Immunodeficiency" (B. F. Haynes and G. S. Eisenbarth, Eds.), pp. 83–95. Academic Press, Orlando, FL, 1983.
3. Katz, D. H., "Lymphocyte Differentiation, Recognition, and Regulation." Academic Press, New York, 1977.

Abbreviations of journal names should follow the style of *Chemical Abstracts Service Source Index,* 1985. Unpublished observations and personal communications should be cited in the text as such, and should not be included in the reference list.

Letters to the Editor relating to articles appearing in *Cellular Immunology* are welcome and will be published, if found suitable, as limited space permits. All letters must be typewritten in the format of other material submitted for publication and limited in length to two typewritten pages.

Author's alterations in excess of 10% of the cost of composition will be charged to the author.

Reprints. 50 reprints will be supplied free of charge. Additional reprints can be ordered on the form accompanying the proof.

Personal computer disks. Manuscripts may be submitted to *Cellular Immunology* on personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular material will be typeset conventionally. Art must be prepared as camera-ready copy; see the section on Figures earlier in this Information for Authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing disks for typesetting conversion, please contact the publisher (Editorial Supervisor, Journal Division, Academic Press, Inc., 1250 Sixth Avenue, San Diego, California 92101; telephone: (619) 699-6415; fax: (619) 699-6800).
